

Method of Evaluation
Project 5: Johnson and Johnson
March 18th – 31st

The following will be the method of evaluation for this project:

- A slide deck of 10 slides submitted by **March 27th, 5:00 pm**
 - To be pushed on GitHub
 - Clear and concise slides
 - Clearly described solutions for each Task
 - Sufficient statistical reasoning without too much jargon
 - Expected to at least attempt the optional Task 4
- 8 groups will be selected to present to the team on April 1st (in-person)
 - 10 minute presentations with 5 minutes for questions
 - Selection based on slide deck
 - Clear communication of results and explanations will be sought
- Final reports to be submitted by **March 31st, 10:00 pm**
 - To be pushed on GitHub
 - Clearly have sections for each Task
 - Ideal reader of the report is NOT a Statistician, but some clinician. So do not overuse technical language.
 - Can be any length, but recommend not longer than 10 pages
- Marks distribution
 - 15 marks for report
 - 5 marks for presentation
 - 0/5 if not selected for presentation
